Full-Stack Developer

Lexagri International

We have an immediate opening for a remote Full-Stack Developer position with experience in #PHP #Symfony #MySQL #Python to join our growing development team.

What do we do at Lexagri International?

Lexagri International is a French company specialized in harmonization, structuring and distribution of agricultural data **though Homologa®, The Global Crop Protection Database**. This database is currently used by some of the most renowned Ag Industries globally to feed their internal information systems. Lexagri International is committed to flexible work and currently has experienced teams working worldwide.

Job description:

The position requires to keep close contact with both our internal IT and agronomist teams with the aim of:

- Design and maintenance of our current database and its web platform developed with PHP7 (Symfony framework), MySQL and Symfony 4/5
- Implement and integrate front-end functionalities to the server logic
- Collaborate in the further development of the platform to improve user experience
- Collaboration in the development and maintenance of web scrapers and parsers

What are we looking for?

- Experience with PHP 7 web application development (ideally Symfony 4/5, Bootstrap, Doctrine).
- Experience with Python (or any other programming language: Java, JavaScript…)
- Experience with databases (ideally MySQL).
- CI/CD : Gitlab, PHPUnit, Docker
- Experience with package manager like Yarn or Gulp
- Familiarity with agile methodologies.
- Excellent communication and teamwork skills.
- Fluent English, written and spoken.
- Strong work ethic and ability to work independently.
- Other technologies : RabbitMQ, Supervisor, Composer, Flex, Sphinx

Location:

- Position based in Archamps (74 - Haute-Savoie)

What do we offer?

- Training and integration period (minimum 3 months)
- Competitive salary
- Personal and professional growth opportunities
- Flexible and remote working schedule
- Innovative and exciting environment.

How to apply?

Send your resume, cover letter and when possible, a professional portfolio with self-produced code (Github, Gitlab or Bitbucket, etc.) to patricia.perez@lexagri.com

We are **#hiring**! Lexagri International is currently looking for a Full Stack Engineer. Are you interested to work on **#Agriculture #Data** in our main offices in Archamps (Auvergne-Rhône-Alpes region)? We might have the position that you were looking for!
