

AGROWIN - World Agrocode Program

Description:

For companies that purchase panel data in the Agriculture sector (Crop Protection and Seeds) from different sources and countries, Lexagri offers an extensive package of services to give them a complete view of the entire market generated by harmonizing multiple data sources

The services and advantages include:

- A standard software package (Agrowin Pro) for the data analysis and data input.
- Standardization and consolidation of market data from multiple sources.
- Maintenance of database, feeding in data, verification and modification of database.
- Supply help to data suppliers and to data analysts.
- Conceive client specific solutions if necessary (Flexigroups).
- Hosting services for the database.
- Windows compatible
- Pivot table reports
- Export option to Excel
- Interface for business intelligence graphic tools
