

Homologa™

HOMOLOGA™ – The Global Plant Protection Database and their Maximum Residue Limits (MRLs)

Content:

1. Brand registrations with information on approved and expired Plant Protection Products

- + 80 countries
- Harmonized database with detailed information: National product name, registration number, company name, active ingredients, formulation, crop, pest, method and time of application, dose rate, maximum number of treatments, Pre-Harvest Interval (PHI), Restricted-Entry Interval (REI) and risk phrases.
- Registration status and type (standard, parallel import, off-label, emergency)
- Private standards on active classification (i.e. Fairtrade, UTZ, Rainforest, UTZ, EU Organic, etc.)

2. Maximum Residue Levels (MRLs)

- + 35 regional MRL standards
Current and future MRLs, residue definitions, Import Tolerances (IT), LOD

3. Import/Export statistics of agricultural products

4. Executive Dashboards (Panorama)

- Interactive dashboards that combines information on Brand registration, MRLs and Trade statistics

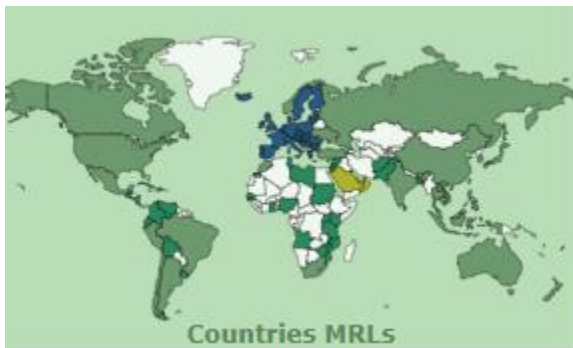

Details:

- Constantly updated data
- Links to the original sources
- Approved products for seed treatment

- Modular access
- Exports (CSV) and alert reports
- Comparison of MRLs between countries and registered products
- English and local languages
- Helpline

How to access:

- Annual subscription
- Secured online access
- Can be integrated in external softwares (API, CSV files)
